

MAEC v4.0.1 Release Notes

September 27, 2013

The changes associated with MAEC version 4.0.1 are listed below:

- Updated schemaLocation attributes to reflect the import and usage of the Cyber Observables eXpression (CybOX) v2.0.1.
- Updated Schematron schema (sch) file to use the correct MAEC namespace.
- Modified the “Package Dynamic Triage” and “Package Manual Analysis” examples to use Action Collections organized by class (e.g., File Actions, Process Actions, etc.). Previously, all Actions in these examples were defined under the top-level Actions element.
